

# MaxRack Hanger | Bike Rack

## SPECIFICATIONS

### MaxRack System

**MaxRack Hanger** is a space-saving, vertical bike rack that is the key component of our modular MaxRack System. MaxRack Hangers offer greater density in a much smaller footprint than ordinary racks without scratching or tangling. MaxRack Hangers feature a unique, extended rod that makes hanging and removing bikes a cinch and a solid steel lock bar for maximum security. Both the front wheel and bike frame are U-lockable. MaxRack Hangers work with all tires and fenders.

Vertical Bike Rack: High density

- Heavy-duty construction w/solid steel lock bars
- Accommodates all tires and fenders
